Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, drawn to an optical communication system.

Group II, claim(s) 12-16, drawn to another optical communication system.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I discloses special technical features that are lacking in Group II. These special technical features are the delay controlling unit, the selection switching control unit, and how both of these units operate together to switch to one of two *optical networks*.

Group II discloses special technical features that are lacking in Group I. These special technical features are virtual paths, the quality monitoring unit, the selection switching control unit, and how the units operate together to switch to an appropriate *virtual path*.

Besides these listed special technical features of Groups I and II, Groups I and II also disclose other limitations, which are common to both groups: a parent device, a plurality of daughter devices, a current-system optical network, and a preliminary system optical network. However, these shared limitations do not define a contribution over prior art. Kumozaki et al. (U.S. Patent 5,539,564) also discloses these limitations in Figs. 4, 6, 13, 20, and 23-24. Thus, these shared limitations do not constitute inventive concepts. Accordingly, Groups I and II are not united by a single general inventive concept and lack unity of invention.

Art Unit: 2633

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
